

Health takes a similar budget share across the income distribution – because poor households often spend nothing

Mean health share of monetary spending by income decile, 2024

Source: ENIGH 2024 (INEGI), household level (Tier 1, no allocation assumption). Deciles of quarterly household current income, weighted. Design-based estimates.

Out-of-pocket spending only; public in-kind provision (IMSS/ISSSTE/SSA services) is not included. Constant Aug–Nov 2024 pesos (general INPC).
