

The right tail of health spending is an order of magnitude above the median

Distribution of positive quarterly OOP health spending within each income decile, 2024 (log scale)

Source: ENIGH 2024, Tier 1, households with positive health spending. Bands: p10–p90 (light), p25–p75 (dark), median line, p95 dashed. The heavy right tail is the shock-response object the model formalizes.

Out-of-pocket spending only; public in-kind provision (IMSS/ISSSTE/SSA services) is not included. Constant Aug–Nov 2024 pesos (general INPC).
